

## Statewide Geotechnical (Aust) Pty Ltd

### Seat Belt Policy

Statewide Geotechnical (Aust) Pty Ltd is committed to maintaining the highest standards of safety across all its work locations, including within company vehicles. In line with this commitment, it is the policy of Statewide Geotechnical that all employees, contractors, and other personnel working on behalf of the company must wear seat belts when driving or traveling in vehicles on work sites, public and private roads, as well as on off-road and mobile equipment, heavy vehicles, forklifts, light commercial vehicles, and sedans. This requirement does not apply when reversing at low speeds in confined spaces.

In instances where seat belts are not currently installed in a Statewide Geotechnical vehicle, the manufacturer's standard seat belt will be fitted at the earliest opportunity.

Statewide Geotechnical's policy exceeds the minimum legal requirements by uniformly enforcing the use of seat belts for all employees, contractors, and others, regardless of the state or territory, or the type of vehicle being used.

A safe workplace is a shared responsibility that benefits everyone. Achieving and maintaining a safe environment can only be realized through the active participation, commitment, and contribution of all individuals involved in enhancing safety standards.
